With all the annoying internet conflicts now I also have time issues. I am going to St George for a baptism this weekend. I can catch up with fish reports on Monday morning before electrofishing sampling Monday night at Wahweap and Tuesday night on the San Juan. I will be back Wednesday afternoon and post a San Juan fish report.

The next week we will electrofish at Good Hope Bay and The Rincon with fish reports to follow from those areas.

You can count on getting these reports. Hopefully many will email me fishing information which I will then post on Anglers Corner. We are moving into the best fishing period of the entire year. We will get this information out to you as best we can. Check Anglers Corner, Fish reports and other new reports that show up to find current fishing information until we can get the whole website operating properly again.

Thanks for your patience and participation.

Wayne
