---

Another tagged walleye (#2166) from Good Hope Bay.

Water temp 60 degrees

Location: Good Hope Bay

Gear 6' 6" ml Fenwick HMX

Revo MGX reel, 6lb fire line

Gulp minnows.

We were pitching 3" "Gulp" minnows in the smelt colors on 1/8 oz heads. The bite ranged from 6-10' of water. The keys were 2-3' visibility, points were best with rocks and gravel patches. A slow retrieve with lift and drops and a few pauses. Fish would hit on the drop 90% of the time.
